TABLE OF CONTENTS

Publication Number: **EM 1110-2-1701**
Title: **Engineering and Design - Hydropower**
Proponent: **CECW-EH**
Publication Date: **31 December 1985**
Distribution Restriction Statement: **Approved for public release; distribution is unlimited.**
File Format: **Adobe Acrobat.pdf.** Adobe Acrobat Reader software is required to read portable document files (pdf). Click Viewers to access free Adobe Acrobat Reader software and follow installation instructions or go directly to the Adobe homepage at http://www.adobe.com.
File Size: Files of 1 MB or larger have had their file size noted.

Changes - This file outlines changes made to the original document.
Transmittal Letter
Table of Contents
Chapter 1 - Introduction
Chapter 2 - General Features of Hydroelectric Development and the Role of Hydropower (File size: 5 MB.)
Chapter 3 - Load Resource Analysis (File size: 1.4 MB.)
Chapter 4 - Hydrologic Data Preparation (File size: 1.1 MB.)
Chapter 5 -Determining Energy Potential (File size: 8.1 MB.)
Chapter 6 - Power Sizing (File size: 3.5 MB.)
Chapter 7 - Evaluating Pumped-Storage Hydropower (File size: 4.4 MB.)
Chapter 8 - Estimating Powerhouse Costs (File size: 1.6 MB.)
Chapter 9 - Economic Evaluation of Hydropower Projects (File size: 3.9 MB.)
Appendix A -Power Study Checklist
Appendix B - Load Forecasting Methods
Appendix C - Computer Models for Power Studies
Appendix D - Calculations for Flow-Duration Method Example
Appendix E - Daily Sequential Routing
Appendix F - Use of the Mass Curve Method to Identify the Critical Period
Appendix G - KW/CFS Curve Computation
Appendix H - Firm Energy Estimate for a Storage Project
Appendix I - SSR Regulaiton Using Alternative Operating Strategies (File size: 1.2 MB.)
Appendix J - Construction of a Rule Curve for Single-Plant Power Operation
Appendix K - Application of the HEC-5 Hydropower Routines (File size: 1.5 MB.)
Appendix L - Calculations for Storage Effectiveness Analysis
Appendix M - Existing Multiple-Purpose Systems in the United States (File size: 4.5 MB.)
Appendix N - Examples of Hourly Studies
Appendix O - Capacity Credit, Intermittent Capacity, and Energy Value Adjustment
Appendix P - Fuel Costs and Fuel Cost Escalation
Appendix Q - System Power Benefits
Appendix R - Conversion Factors
Appendix S - Glossary
Appendix T - Bibliography
Appendix U - Index
Entire - Because of its size (45 MB), the "Entire" file has not been posted here.
