U.S. Army Corps of Engineers
BUILDING STRONG®

Exciting Careers in... Natural Resources Management

The U.S. Army Corps of Engineers (USACE) is one of the world's premier public engineering, design and construction management agencies. USACE includes more than 37,000 dedicated civilians and over 550 soldiers who deliver timely and quality engineering, technical and management services to customers in more than 90 countries. We have a broad range of missions in support of the Department of Defense and the nation to include design and construction of military facilities, engineering research and development, water and natural resource management, and support to other government agencies. We provide the opportunity to work in major cities, small communities and at offices throughout the world.

Natural Resources Management

As the nation's largest Federal provider of outdoor and water-based recreation, USACE provides employees with the opportunity to join a diverse team of skilled professionals who work every day to preserve, manage and improve nearly 12 million acres of our nation's public lands and waters.

We also offer challenging career opportunities in these fields and more:

- Park Rangers manage Federal lands, waters, and park resources at Corps operated and maintained water resources projects. They are leaders in both emergency response and community outreach.

- Natural Resources Specialists manage and conserve those natural resources consistent with ecosystem management principles. They also provide quality public outdoor recreation experiences to serve the needs of present and future generations.

In addition to offering a challenging and rewarding work environment, we offer competitive salaries, training and outstanding benefits.

For more information on civilian employment opportunities, please visit www.usace.army.mil/employment.
