

U.S. Army Corps of Engineers
BUILDING STRONG®

Exciting Careers *in...* *Facilities Management*

The U.S. Army Corps of Engineers (USACE) is one of the world's premier public engineering, design and construction management agencies. USACE includes more than 32,000 dedicated civilians and over 550 soldiers who deliver timely and quality engineering, technical and management services to customers in more than 100 countries. We have a broad range of missions in support of the Department of Defense and the nation to include design and construction of military facilities, engineering research and development, water and natural resource management, and support to other government agencies. We provide the opportunity to work in major cities, small communities and at offices throughout the world.

Facilities Management Specialist

Facilities Managers with USACE provide logistics products and services in support of our military, our nation, and the world. We oversee and execute improvements to support military and civil works missions globally. As a USACE Facilities Professional, you will have the opportunity to travel and live both in the continental United States and abroad in these fields and more:

Space Managers

Building Managers

Equipment Managers

Energy Conservation

Property Managers

Engineering Technology

Facilities Managers

In addition to offering a challenging and rewarding work environment, we offer competitive salaries, training and outstanding benefits.
