

watertoolbox.us

Promotes **Sustainable Water Management** to:

- Advance a strategic systems view – the long view... the big picture
- Integrate water resources stakeholders, goals, activities, impacts and benefits
- Proactively identify strategic water issues
- Streamline processes
- Align programs and resources for efficiency gains and save resources
- Scope future water needs and opportunities at a watershed level

The **Federal Support Toolbox** is a dynamic, evolving and comprehensive "one-stop-shop" water resources data portal with direct links to:

- Valuable databases
- Innovative programs and initiatives
- State-of-the-art models and tools

For the water resources community, it serves as a leading-edge resource for:

- Sharing ideas and water resources needs
- Best management practices
- Collaborations and partnerships
- And more
